<b>Abstract . . . . .</b>	<b>iii</b>
<b>Resumen . . . . .</b>	<b>v</b>
<b>1 Introduction . . . . .</b>	<b>1</b>
Cristina Verde	
1.1 Background and motivation . . . . .	1
1.2 Fault detection and tolerant control . . . . .	4
1.2.1 On-line supervision . . . . .	4
1.2.2 Diagnosis process . . . . .	6
1.3 Structure and monograph content . . . . .	7
<b>References . . . . .</b>	<b>9</b>
<b>2 Intelligent Control System for High Speed Machining . . . . .</b>	<b>11</b>
Antonio Jr. Vallejo Guevara, Ricardo A. Ramírez Mendoza and Ruben Morales-Menendez	
2.1 Introduction . . . . .	11
2.2 State of the Art . . . . .	12
2.2.1 High-Speed Machining . . . . .	12
2.2.2 Surface Roughness ( $R_a$ ) Modeling . . . . .	14
2.2.3 Cutting Tool Wear Condition (CTWC) Modeling . . . . .	15
2.3 Experimental Set Up . . . . .	17
2.4 Experimental Database . . . . .	17
2.4.1 Surface Roughness Database . . . . .	20
2.4.2 Cutting Tool Wear Condition Database . . . . .	22
2.5 Intelligent Control System . . . . .	23
2.5.1 Data Acquisition Module . . . . .	23
2.5.2 Cutting tool Module . . . . .	24
2.5.3 Surface Roughness Module . . . . .	24
2.5.4 Planning Module . . . . .	24
2.6 Results . . . . .	26
2.6.1 Surface Roughness Modeling . . . . .	26

2.6.2	Cutting Tool Wear Condition Modeling .....	28
2.6.3	Off-line Optimization .....	30
2.6.4	Machining Policy .....	31
2.7	Conclusions .....	32
<b>References</b> .....		35
<b>3</b>	<b>Experimental results of fault isolation approach for a 2-DOF helicopter</b> .....	39
Manuel Alejandro Zuñiga, Luis Alejandro Ramírez, Gerardo Romero Galvan, Efraín Alcorta García, and Aldo J. Muñoz Vázquez		
3.1	Introduction .....	39
3.2	Preliminaries .....	40
3.2.1	Generalized Hamiltonian systems .....	40
3.2.2	Fault isolation schema .....	41
3.3	Helicopter with two degrees of freedom .....	41
3.3.1	Hamiltonian representation .....	42
3.3.2	Fault Modeling .....	43
3.4	Fault isolation for a 2-DOF Helicopter .....	46
3.4.1	Residual Generator Design .....	46
3.5	Experimental results .....	48
3.5.1	Fault scenarios and experimental results .....	50
3.6	Conclusion .....	51
<b>References</b> .....		53
<b>4</b>	<b>Buck-boost converter fault diagnosis for an EDF-100 distillation pilot plant</b> .....	55
Mario Heras Cervantes, Adriana del Carmen Téllez Anguiano, and Juan Anzurez Marin		
4.1	Introduction .....	55
4.2	Model of a distillation column and its heating actuator .....	56
4.2.1	Nonlinear model of the distillation column .....	58
4.3	Case study: EDF-1000 distillation pilot plant .....	61
4.3.1	State-space model of the EDF-1000 distillation pilot plant .....	61
4.3.2	EDF-1000 heating actuator scheme and model .....	62
4.4	Observers design .....	67
4.4.1	Takagi-Sugeno fuzzy observer .....	68
4.4.2	Sliding-Mode fuzzy observer .....	69
4.4.3	Sliding-Mode Takagi-Sugeno fuzzy observer .....	70
4.5	Design of the sliding-mode Takagi-Sugeno fuzzy observer for the boiler heating actuator .....	70
4.5.1	Validation of the sliding-mode Takagi-Sugeno fuzzy observer for the heating actuator .....	71
4.5.2	Fault detection for the boiler heating actuator .....	73
4.6	Experimental validation of the FDI system .....	75
4.6.1	Test 1: Load decrease .....	76
4.6.2	Test 2: Input voltage decrease .....	77

Contents	xiii
4.6.3 Test 3: Simultaneous faults . . . . .	79
4.7 Conclusions . . . . .	80
<b>References . . . . .</b>	83
<b>5 Adaptive multivariate degradation model for remaining useful life prediction . . . . .</b>	85
Adriana Villalón Falcón, Alberto Prieto Moreno, Marcos Quiñones-Grueiro, and Orestes Llanes-Santiago	
5.1 Introduction . . . . .	86
5.2 Performance metric . . . . .	89
5.2.1 Proposed performance metric . . . . .	89
5.3 Procedure for RUL prediction . . . . .	91
5.3.1 Preprocessing . . . . .	93
5.3.2 Degradation modeling . . . . .	94
5.3.3 RUL prediction . . . . .	100
5.3.4 On-line procedure . . . . .	104
5.4 Application of the proposal . . . . .	104
5.4.1 Case study . . . . .	105
5.4.2 Preprocessing . . . . .	105
5.4.3 Model training . . . . .	106
5.4.4 Model validation . . . . .	111
5.5 Conclusion and future work . . . . .	113
